INSTRUCTIONS FOR LEVEL OF CARE EVALUATION FORM OCHA ARCH N 2

The form is used to determine the level of care and supervision required by a resident prior to the resident's referral and admission into a licensed adult residential care home.

Level of care is defined to mean a resident's functional level. In Adult Residential Care Homes, residents shall not need assistance from skilled, professional personnel on a long-term basis, and shall not need services provided in an intermediate care facility.

This form should be used for all admissions to Adult residential care homes.

Prior to admission, a physician or APRN shall complete this form.

Activities of Daily Living:

1. Circle the points under each Level column as applicable to the person being evaluated.
2. Add up the circled points for each Level and record the totals in the space provided.
3. If more than 10 points are totaled in this area, the patient should be assessed in total as to appropriateness of placement. Patient shall not require assistance from skilled, professional personnel on a regular, long-term basis.

Supervision and Behavior Management:

1. Circle appropriate points and total.
2. If more than 5 points are totaled in this area, patient should be assessed in total as to appropriateness of placement. Patient shall not require assistance from skilled, professional personnel on a regular, long-term basis.

Health-Related Services-Per Physician/APRN Orders:

1. Circle appropriate points and total.
2. If more than 6 points are totaled in this area, patient should be assessed in total as to appropriateness of placement. Patient shall not require assistance from skilled, professional personnel on a regular, long-term basis.

Level of Care Assessment:

Indicate whether the patient is appropriately assessed for admission into the care home. Judgment is needed based on the total assessment of the resident. The three levels which might be considered are:

- (1) Adult Residential Care Home
- (2) Intermediate Nursing Care Level (ICF)
- (3) Skilled Nursing Care Level (SNF)

Adult Residential Care Home level means patient does not require care, oversight, or supervision of a licensed nurse and/or other professional.

Intermediate (ICF) nursing care means the patient requires oversight and supervision by a licensed nurse or other professional personnel on a regular, long-term basis.

Skilled nursing care means the resident requires the skill, care, oversight, and supervision of a licensed nurse or other professional personnel 24 hours a day.
